LIGHTING MANAGEMENT SYSTEM

SmartCast Power over Ethernet (PoE) is designed to securely connect with building management systems, enterprise-wide networks, and the Internet. Built on a future-ready open platform with a standards-based API, the product can cut energy costs up to 70% and eliminates the challenges of ordinary PoE lighting by automating the initial setup and commissions hundreds of devices with one button. In addition, it is open, scalable, secure, and enables the Internet of Things (IoT) for buildings.
